WORK EXPERIENCE

RipeSeed   **Lahore, PK**
Software Engineer   *June 2022 – Present*
- Developing a Cloud Security SaaS, which acts as a firewall for resources deployed over AWS.
- Led the development of several products, from identifying system requirements to delegating tasks, software implementation, testing, and iterating over client feedback.
- Provisioned and managed a variety of AWS resources using either cloud formation or terraform to deploy scalable and secure systems over the cloud.
- Developed serverless applications using both Node Js and GoLang.

Upwork   **Remote, PK**
Top-Rated Web Developer   *December 2020 – Present*
- Migrating an old Angular-based admin panel to React. Improving the current system and adding new features to improve accessibility and workflow.
- Delivered multiple front-end and full-stack applications by identifying client and business requirements and software implementation using technologies such as React/Next/Node/AWS/Shopify, etc.
- Worked on creating an external Shopify App using Shopify Admin APIs and Shopify Polaris.
- Worked on improving a Shopify plugin and made CSS transitions for product catalogs for all the free themes.

Robor   **Islamabad (Remote), PK**
Junior Full Stack Developer   *December 2021 – April 2022*
- Developed a baseball card NFT marketplace dapp for Agoric. Agoric is a framework that utilizes javascript to develop secure smart contracts.
- Used Next JS, TypeScript, and Tailwind CSS to develop the complete UI for Kontractory, an online law firm that provides contracts and support for various legal matters. Followed the best practices and conventions to develop the UI.

EasyPaisa (Telenor Microfinance Bank)   **Islamabad, PK**
Information Technology Intern   *July 2021 – August 2021*
- Utilized Java Spring Boot framework to create back-end APIs.
- Learned about easy paisa and how it operates behind the scenes. Learned what technologies it uses and what kind of architecture it follows.

Hactric Solutions (Pvt) Ltd   **Islamabad, PK**
React JS Developer   *November 2020 – January 2021*
- Developed front-end applications using React, and handled state management to optimize the application using Redux.
- Integrated back-end APIs to front-end applications and managed the states.
